

Muhammed Rashid

Software Engineer

 Email |  Phone |  GitHub |  LinkedIn |  Portfolio

TECHNICAL SKILLS

JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, MySQL, HTML5, CSS3, Docker, Kubernetes, Git

EXPERIENCE

Junior Software Engineer

Junkies Coder

Mar 2024 – Present

Ahmedabad, Gujarat

- Designed and implemented scalable RESTful APIs using **Node.js** and **Express.js**, reducing response latency by **25%** and improving backend performance.
- Integrated secure payment systems, cloud storage, email services, and OTP-based authentication, enabling robust and user-friendly platform features.
- Diagnosed and resolved production issues, achieving a **30% reduction in system downtime** and significantly enhancing application stability.
- Actively participated in Agile development processes—including sprint planning, daily stand-ups, and retrospectives—to ensure consistent delivery of high-quality features.
- Collaborated with cross-functional teams across frontend, backend, and mobile platforms to build well-aligned, full-featured applications.
- Maintained version control with Git, performed code reviews, and ensured clean, maintainable code aligned with industry best practices.

PROJECTS

TalentTrove – Online Job Portal

React.js, Node.js, Express, MongoDB, Socket.IO, OAuth 2.0, JWT

 GitHub |  Live

- Developed a full-stack job portal with role-based dashboards for candidates, recruiters, and administrators.
- Enabled real-time chat functionality using **Socket.IO**, facilitating instant candidate-employer communication.
- Implemented secure user authentication and role-based authorization with **JWT** and **OAuth 2.0**.
- Built an admin panel for managing job listings, user accounts, skill assessments, and approvals.
- Implemented skill test creation and evaluation features, allowing recruiters to assess candidates directly through the platform.
- Optimized database queries and backend logic to enhance performance and scalability.

E-Cart – E-commerce Platform

Node.js, Express.js, MongoDB, EJS, Stripe, Twilio, OAuth

 GitHub |  Live

- Built an e-commerce platform featuring a responsive product catalog, user authentication, cart system, and order management.
- Integrated **Stripe** to enable secure and seamless payment transactions.
- Added **Twilio-based OTP verification** to enhance user account security.
- Developed a custom admin dashboard for managing users, products, orders, and real-time sales insights.
- Implemented OAuth-based login and email workflows using **Nodemailer** for password recovery.
- Ensured end-to-end mobile responsiveness and optimized backend APIs for a smooth user experience.

EDUCATION

Full Stack Development

Prototype – Brother You Never Had

Jun 2023 – Feb 2024

Trivandrum, Kerala

Bachelor of Computer Applications

Mahatma Gandhi University

2020 – 2023

Kottayam, Kerala
